## 30-90 MIN ONLINE-ENABLED, CUSTOMIZED PEER LEARNING

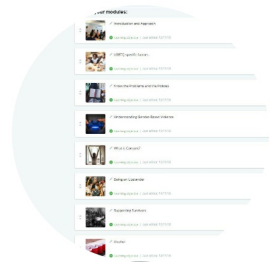

### CAPABILITY BUILDING

Gaming techniques and interactive discussion to practice and develop communication skills, not passively listen or click-through.

### CUSTOMIZABLE

Every community is different and we meet your needs, like subpopulation-specific modules. Plus, students schedule on their own time.

### RESEARCH-BASED

Proven behavioral science design and based on sexual violence research. We also measure and track specific outcomes post-program to show what worked.

### LASTING PEER SUPPORT

Students train in pairs for ongoing feedback and support after. They feel more open and comfortable with friends, and are challenged to think.

### INCREASING AWARENESS & KNOWLEDGE VS CHANGING BELIEFS & BEHAVIOR

Increasing awareness of biases is not enough to actually change behavior, especially because people tend to think they are better than average (superiority bias and "that's not me" mindset).

It is incredibly hard to change deep-rooted beliefs, especially with limited training time. We'll collaborate with you to prioritize which specific beliefs and behaviors are closest linked to sexual assault on your campus, and will track metrics to hold ourselves accountable to real results.

### ABOUT CONFI

Confi is a digital health content provider that creates engaging, expert-approved content on sensitive health topics. Confi.co is a free online community for students, covering sexual health, relationships, OB/GYN and mental health. Its founders are HBS & HGSE recent alumni, deeply understanding the student perspective, and are passionate about reducing sexual violence.
